

Quantum Cryptographic Risk Report

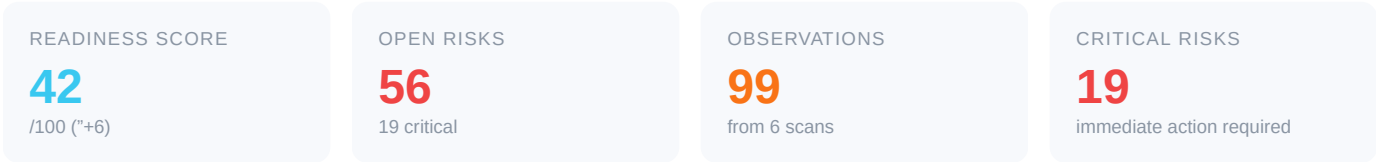

northstar-financial-group · Generated 13 Jul 2026 · CONFIDENTIAL

Executive Summary

northstar-financial-group has a Quantum Readiness Score of 42/100 (+6 since last period). Automated cryptographic discovery has identified 99 cryptographic observations across the assessed systems and codebases.

19 CRITICAL and 18 HIGH severity quantum risks are currently open, representing immediate exposure to harvest-now-decrypt-later attacks and future quantum decryption. Remediation prioritisation should focus on key establishment and digital signature algorithms first.
